

The XS-102 key dispenser is an advanced solution for managing electronic keys in hotels and other establishments. It allows the quick and efficient issuance of RFID cards when the customer identifies themselves through a QR code and it integrates a user-friendly 15,6" touchscreen.

• MAIN FEATURES:

Durable metal structure: made of 1 mm lacquered steel, offering strength and durability, making it ideal for locations that require constant use.

15,6" display: integrated capacitive touchscreen to show personalized messages, such as usage instructions, room information, and promotions.

Easy to Use: intuitive interface allowing customers to obtain their key without direct interaction with staff.

Compact and lightweight: ideal for countertop installation in reception areas to optimize the available space.

• TECHNICAL SPECIFICATIONS:

Power supply: 110-240 V AC, 50/60 Hz

Connectivity: Ethernet (RJ45) / WiFi / (optional) 4G, depending on the model

Operating temperature: 0° C to 45° C

• INSTALLATION RECOMMENDATIONS:

- The XS-102 dispenser is designed to be **placed on a counter**.
- Installation area should have **appropriate access** to power and data networks (Ethernet or Wi-Fi).
- Avoid installation in areas with **high exposure** to direct sunlight or excessive heat sources.

• CARE AND MAINTENANCE :

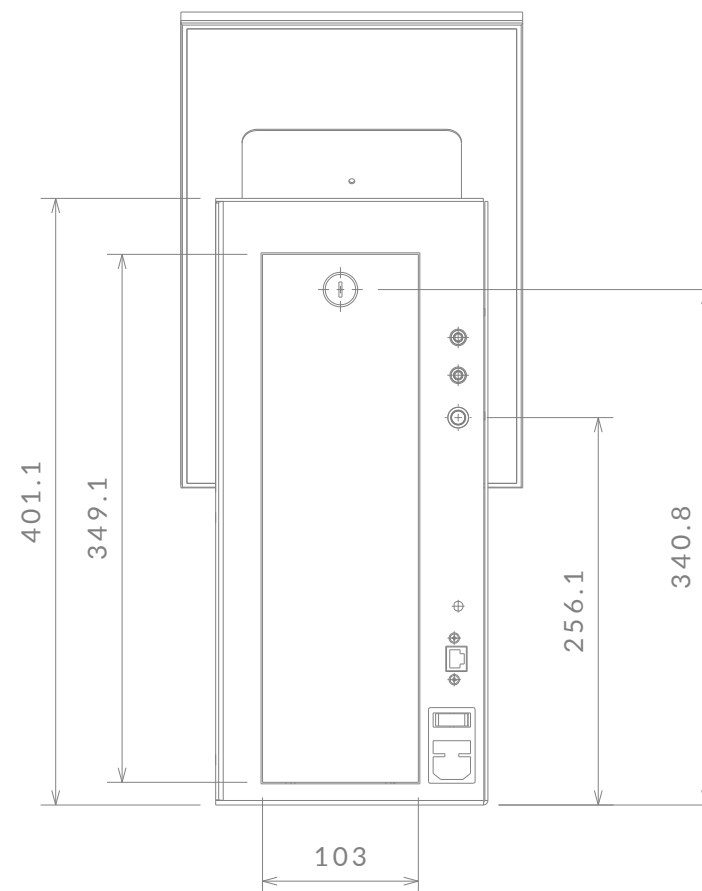

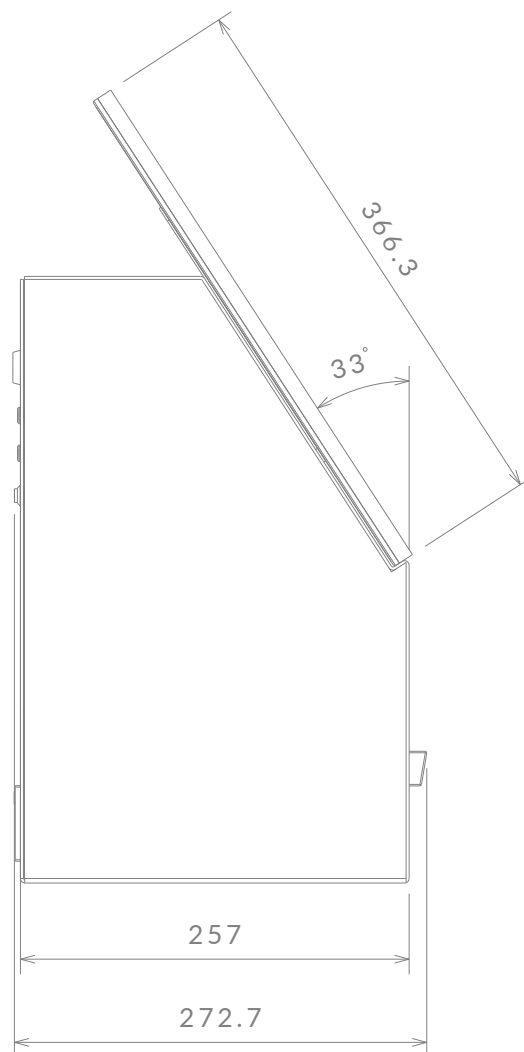

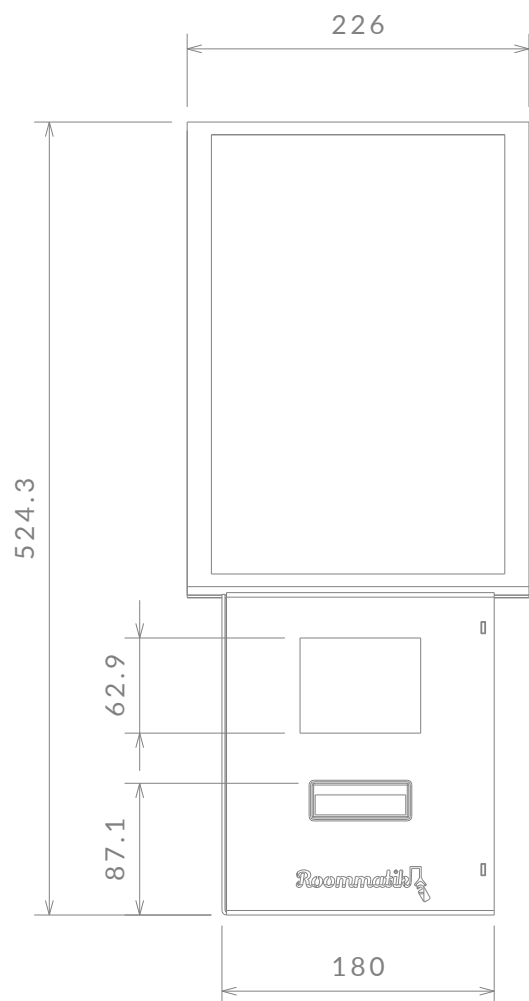

Regular Cleaning and Inspection: clean regularly with a cloth, avoiding the use of abrasive or corrosive products, and periodically check the condition of components and the mounting of the kiosk if exposed to vibrations or movement.

Software Updates: install necessary updates to ensure maximum compatibility and efficiency.
