

KIOSK S-600

The S-600 kiosk is designed to be embedded in the reception desk, offering a compact and functional solution. Equipped with a 21,5-inch touchscreen, it provides a high-resolution user interface, ideal for an interactive and smooth experience. The kiosk includes a QR code reader and a scanner for IDs and passports, allowing for fast and secure identity verification. It also features a ticket printer as well as an integrated payment terminal to securely process transactions, all in one device.

The kiosk's structure is made of lacquered steel, providing great strength and durability, along with an elegant and modern finish. Its robust and compact design makes it ideal for high-demand environments like hotel receptions, optimizing space without compromising functionality.

KIOSK S-600 main dimensions

-  Scale 1:10
-  2 mm steel structure
-  21,5" screen
-  Weight: 15 kg

INSTALLATION SPECIFICATIONS

1. Install the kiosk inside the hole, leaving at least 1 extra cm on each side and at the bottom to ensure proper ventilation (min. dimensions: 365 x 565 x 110 mm)
2. Preferably, leave a rear access to have access to the connector area (in blue).
3. After placing the kiosk in the hole, secure it by tightening the 8 lateral brackets (in orange).
